Progress for the planet.

Accoya takes sustainability seriously.
The paper used in printed versions of this
brochure is FSC® certified and bio-degradable.
Please print digital versions sparingly.

Wood to change the world.

Accoya wood is made by Accsys at its plant
in Arnhem, in the Netherlands. Accsys transforms
fast-growing, certified sustainable wood into
Accoya wood through its proprietary acetylation
process. The result is high performing sustainable
timber with sustainability credentials that exceed
those of man-made, intensely resource depleting
and heavily carbon-polluting alternatives.
